| Suspension  | <i>Each 5ml contains :</i><br>Ibuprofen                                                                  | 100mg                        |
| Syrup       | <i>Each ml contains :</i><br>Camylofin                                                                   | 20mg                         |

# Antibiotics

| Dosage Form | Composition                                                                                                                      | Strength              |
|-------------|----------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Syrup       | <i>Each 5ml contains :</i><br>Azithromycin                                                                                       | 100mg                 |
| Syrup       | <i>Each 5ml contains :</i><br>Azithromycin                                                                                       | 200mg                 |
| Syrup       | <i>Each 5ml contains :</i><br>Azithromycin                                                                                       | 20mg                  |
| Tablet      | <i>Each film tablet contains :</i><br>Linezolid                                                                                  | 600mg                 |
| Suspension  | <i>Each 5ml (teaspoonful) contains:</i><br>Chloramphenicol Palmitate eq. to<br>Chloramphenicol IP 125mg<br>Flavoured Syrupy Base | 20mg<br>125mg<br>q.s. |
| ▲ Powder    | <i>Each gram contains :</i><br>Erythromycin Thiocyanate<br>Eq. to Erythromycin                                                   | 100mg                 |
| ▲ Powder    | <i>Each gram contains :</i><br>Erythromycin Thiocyanate<br>Eq. to Erythromycin                                                   | 200mg                 |
| ▲ Powder    | <i>Each gram contains :</i><br>Azithromycin                                                                                      | 100mg                 |

# Anti-Fungal

| Dosage Form | Composition                                                                                                 | Strength      |
|-------------|-------------------------------------------------------------------------------------------------------------|---------------|
| Capsule     | <i>Each tablet contains :</i><br>Itraconazole                                                               | 100mg         |
| Capsule     | <i>Each tablet contains :</i><br>Itraconazole                                                               | 200mg         |
| Tablet      | <i>Each uncoated tablet contains :</i><br>Terbinafine Hydrochloride BP<br>eqv. to Terbinafine<br>Excipients | 250mg<br>q.s. |

# Anti-Hemorrhoidal

| Dosage Form | Composition                                                                                                                                                  | Strength       |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Tablet      | <i>Each film coated tablet contains :</i><br>Micronized purified flavonoid fraction of<br>Rutaceae composed of Diosmin Flavonoids<br>expressed as Hesperidin | 900mg<br>100mg |

# Anti-Epileptics

| Dosage Form | Composition                                               | Strength |
|-------------|-----------------------------------------------------------|----------|
| Syrup       | <i>Each 5ml contains :</i><br>Levetiracetam Oral Solution | 500mg    |
| Tablet      | <i>Each Film Coated Tablet Contains:</i><br>Levetiracetam | 250mg    |
| Tablet      | <i>Each Film Coated Tablet Contains:</i><br>Levetiracetam | 500mg    |
| Tablet      | <i>Each Film Coated Tablet Contains:</i><br>Levetiracetam | 750mg    |
| Tablet      | <i>Each Film Coated Tablet Contains:</i><br>Levetiracetam | 1000mg   |
| Suspension  | <i>Each 5ml contains :</i><br>Phenytoin                   | 30mg     |

# Anti-Cholelithic

| Dosage Form | Composition                                                                                                                                                                                                                 | Strength      |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Suspension  | <i>Each 5ml contains :</i><br>Ursodeoxycholic acid                                                                                                                                                                          | 125mg         |
| Tablet      | <i>Each uncoated sustained release tablet contains:</i><br>Ursodiol USP (Ursodeoxycholic acid)<br>Excipients                                                                                                                | 450mg<br>q.s. |
| Tablet      | <i>Each uncoated tablet contains :</i><br>Ursodiol (Ursodeoxycholic acid)                                                                                                                                                   | 300mg         |
| Tablet      | <i>Each uncoated tablet contains :</i><br>Ursodiol Sustained Release<br>(Ursodeoxycholic Sustained Release Tablets)                                                                                                         | 200mg         |
| Tablet      | <i>Each Uncoated dispersible tablet contains:</i><br>Potassium Magnesium Citrate<br>( Each tablet contains approx. 3.5 m eq.<br>Magnesium ion, 7m eq.<br>Potassium ion, 10.5 m eq. Citrate ion)<br>Pyridoxine Hydrochloride | 978mg<br>15mg |
| Tablet      | <i>Each film coated tablet contains:</i><br>Levocarnitine USP<br>Excipients                                                                                                                                                 | 500mg<br>q.s. |
| Granules    | <i>Each 15g Sachet Contains :</i><br>Calcium Polystyrene Sulphonate<br>Excipients                                                                                                                                           | 15g<br>q.s.   |

# Anti-Pyretic

| Dosage Form | Composition                                                                                       | Strength                |
|-------------|---------------------------------------------------------------------------------------------------|-------------------------|
| Tablet      | <i>Each film coated tablets contains :</i><br>Lornoxicam                                          | 4mg                     |
| Tablet      | <i>Each film coated tablets contains :</i><br>Lornoxicam                                          | 8mg                     |
| Tablet      | <i>Each film coated tablets contains :</i><br>Lornoxicam Extended Release                         | 16mg                    |
